GUARANTEED ANALYSIS

Total Nitrogen(N)	15%
15% Nitrate Nitrogen	
Calcium(Ca)	19%

Derived from: Calcium Nitrate

A professional calcium and nitrogen supplement, which provides key primary and secondary nutrient sources that pair with our **GROWTH** and **FLOWER** formula.

GENERAL DIRECTIONS FOR USE

- Mix for calcium with products like **GROWTH** and **FLOWER**.
- Mix 3.0 grams per gallon or 0.66 pounds per 100 gallons applied during growth.
- Mix 4.2 grams per gallon or 0.93 pounds per 100 gallons applied during flower.
- Make sure pH is adjusted between 5.5 - 6.5 after nutrients are mixed into solution for optimal results.
- Limit of solubility = 3.5 pounds per gallon.

IMPORTANT NOTES

E.C. value is the best method to determine fertilizer strength. E.C. value assumes using RO water. For best results, stir thoroughly with warm water. Some raw materials are slower to dissolve than others. Keep stock tank covered to reduce light and debris.

Feeding instructions are compatible with continuous and intermittent feeding programs. Desired concentrations will vary depending on weather conditions, temperature, precipitation, drought, soil composition, water pH and cultivar vigor.

CONVERSIONS

8 fl. oz. = 1 cup | 28.35 g = 1 oz. | 1 fl. oz. = 2 tbsp. | 16 oz. = 1 lb. | 453.592 g = 1 lb.
1 cup (8 fl. oz.) of dry BASE ≈ 260 g ≈ 9.17 oz.
1 lb. of dry BASE ≈ 1.75 cups

KEEP OUT OF REACH OF CHILDREN. STORE IN A COOL DARK PLACE.
